SUBJECT INDEX, VOLUME 9

Acenaphthylene, polymerization with tetracyanoethylene, 533
Acetyl perchlorate, molecular weight distribution of polystyrene, obtained by, 783
Acrolein-diethyl and acrolein-dibutyl ether acetals, radical copolymerization with acrylonitrile, 641
Acrylic monomer, and butadiene, uv-irradiation polymerization of, 805
Acrylonitrile, and butadiene alternating copolymer, glass transition temperature, 199
and styrene, copolymerization under uv-irradiation, 823
complexed, alternating copolymerization with vinyl chloride, 539
complexed, and vinylidene chloride, alternating copolymer from, 205
radical copolymerization with acrolein-diethyl and acrolein-dibutyl ether acetals, 641
Alkyllithium initiated polymerizations, 219
Amino acids, crystalline, thermal stability of, 521
Benzoylperoxide, generation of free radicals in polymer matrix, by thermal decomposition of, 753
Biaxial stretching studies, of polypropylene films, 723, 797
Biopolymers, polyelectrolyte, 467
Bis(N-vinyl carbamates, and diols, poly-(ether- urethanes) from, 911
Blood, graft copolymerization on to, 453
Butadiene, and acrylic monomer, uv-irradiation copolymerization of, 805
and acrylonitrile alternating copolymer, glass transition temperature, 199
and propylene, alternating copolymer, NMR spectra of, 931
1,3-, PMR study of reaction with bis (π-crotyl nickel iodine), 71
n-C_4H_{10}, diffusion in polyethylene, 477
Cellulose, fine structure and reactivity, 767
Cellulose triacetate, transition temperature of, 591
Cerium (IV), and starch, rheological method of investigating reaction between, 711
Chain end, structure in organolithium polymerization of dienes, 61
Chromatography, gas, observation of cellulose triacetate transition temperature, 591
Conduction, anomalous, in polymer films, 43
Contact angle measurement, preparation of polymer films for, 569
Copolymer, A-B block, light scattering in mixtures with A and B homopolymer, 321
alternating, from vinylidene chloride and complexed acrylonitrile, 205
alternating, graft copolymers, 617
alternating, of acrylonitrile and butadiene, glass transition temperature, 199
Copolymerization, alternating, of vinyl chloride with complexed acrylonitrile, 539
alternating, role of uv-irradiation and vanadyl compound in, 179
graft, of methyl methacrylate onto proteins and fibers, 25
graft, onto blood, 453
of styrene, photochemically initiated, with methyl methacrylate and acrylonitrile, 927
of vinyl hydroquinone and methyl methacrylate, 367
radical, of acrolein-diethyl and acrolein-dibutyl ether acetals with acrylonitrile, 641
radical, of 2,3-diphenylbutadiene with liquid sulfur dioxide, 473
spontaneous, of 4-phenyl-1,2,4-triazoline-3,5-dione with vinyl ethers, 115
uv-irradiation, of styrene and acrylonitrile, 823
Copolymers, alternating block, single crystals of polydimethyl siloxane and polycarbonate, 145
alternating, diene-dienophile, 359
alternating graft, 379, 387, 923
alternating, NMR spectra of propylene-butadiene, 931
alternating, of vinyl chloride and methyl methacrylate, preparation and lactoni-

zation, 347
alternating, preparation of, 97
block, depolarized light scattering from, 747
block, of styrene-1 α-methylstyrene, investigations on conformation, 871
butadiene-methacrylic acid, morphology of, 167
equimolar alternating, of vinyl chloride and methyl methacrylate, 419
graft, of starch-polyacrylonitrile, molecular weight distribution of polyacrylonitrile moiety of, 151
propylene-ethylene, NMR spectra, 109
Cotton blends, radiation-induced reaction of styrene with, 915
Cotton cellulose, formaldehyde-treated, feasibility of isolating formaldehyde-bearing constituents from, 647
γ-irradiated, dipolar aprotic solvents effects on stability of free radicals of, 503
Crystalline amino acids, thermal stability of, 521
Crystalline polymers, laser beam interaction with supermolecular structural elements, 813
Crystalline polyoxymethylene, end-group orientation in, 579
Crystalline structures, of poly-D-mannuronic and poly-L-guluronic acids, 311
Crystallization, epitaxial, of polyoxymethylene in course of polymerization in aqueous solution, 895
Crystallized, trans-1,4-polyisoprene in the stretched state, 771
Crystals, single, of alternating block copolymers of polydimethyl siloxane and polycarbonate, 145
single of polyethylene, studies of 2-phase structure of, 583
Cyclic Molecules, produced during γ-irradiation of linear polydimethylsiloxane, 863
Cyclocopolymerization, spontaneous, of 1,4-diene pair, 125
Cyclopolyisoprene, differentiation between cyclized 1,4-polyisoprene, 49
Dichroism, circular, of stereospecific asymmetric polyamides, 161
Diene, and dienophile, alternating copolymer, 359
1,4-Diene pair, spontaneous cyclocopolymerization, 125
Dienophile, and diene, alternating copolymer, 359
Dienes, conjugated, structure of some polysulfones of, 901
Diffusion coefficients, of polymers, 55
N-(1,1-dimethyl-3-oxobutyl)-acrylamide (diacetone acrylamide), γ-radiation-induced polymerization, 831
1,1-Dimethyl-1-silacyclo-3-pentene, ring-opening polymerization of, 341
Diols, and bis(vinyl carbamate), poly(ether-urethanes) from, 911
2,3-Diphenylbutadiene, radical copolymerization with liquid sulfur dioxide, 473
Disordered systems, evolution of long-range order in, 573
N,N′-Disubstituted-2-imino-oxazolidines, cationic polymerization of, 735
Donor-acceptor interaction, sensitizing photo and thermal polymerization, 327, 331
Drag-reduction effectiveness, of polymer solutions, 851
Dynamic properties, temperature dependence of, of polyisobutylene-decalin system, 449
Effective values ϕ, intrinsic linkage reinforcement ϕ_0 from swelling measurements of, 509
Elastomers, free radicals formed during mechanical degradation, 605
Episulfides, polymerization by metal perchlorates, 225
Epoxides, polymerization by metal perchlorates, 225
Ethynyl group, as pendant side chain, polymer preparation, 275
Eu(DMP)$_3$ chemical shift reagent, applied to determination of poly(propylene glycol) molecular weight by NMR, 491
Formaldehyde-bearing constituents, feasibility of isolating, from formaldehyde-treated cotton cellulose, 647
Formaldehyde-phenol polymer, fracture surface regularity, 677
Free radicals, formed during mechanical degradation of elastomers, 605
Gel permeation chromatography, internal calibration of, 413
terms and relationships, recommended, 401
Grafting limit, of polyisoprene on carbon black, 195
Halogenation, of polyethylene, 843

Homopolymer, A and B, light scattering in mixtures with A-B block copolymers, 321
Hydrogen, effect on rate of Ziegler- Natta polymerizations, 661
Indene, cationic polymerization of, 891
Inorganic salts, effect on fusion temperature and crystallinity of melt-crystallized nylon-6, 561
Interface theory, between immiscible polymers, 741
Least-squares approach, determination of degree of polymerization from NMR data, 657
Light scattering, by spherical domain structures formed in A-B block copolymers and homopolymer mixtures, 321
depolarized, from block copolymers, 747
photographic, measuring of anisotropic superstructure in segmented polyurethanes, 761
Light scattering measurements, on liquids, at small angles, 695
Mesityl oxide, hydrogenation with ruthenium(III) complexes, 729
Metallic salts, catalytic action of, in autooxidation and polymerization, 497
Methyl acetoacetate, asymmetric hydrogenation of, 459
2-Methylbut-3yn-2-ol, linear polymerization of, 19
Methyl α-chloroacrylate, polymerization of, and methyl methacrylate, 129
Methyl methacrylate, and vinyl chloride, equimolar alternating copolymer, 419
and vinyl chloride, preparation and lactonization of alternating copolymer, 347
and vinylhydroquinone, copolymerization, 367
graft copolymerization onto proteins and fibers, 25
polymerization of, and methyl α-chloroacrylate, 129
radical polymerization of, 375
Methyl methacrylate-stannic chloride complex, interaction with styrene or toluene, 789, 883
Molecular weight distribution, of polyacrylonitrile moiety of starch-polyacrylonitrile graft copolymers, 151
of polystyrene, obtained by acetyl perchlorate, 783
Monomers, topochemical reactions of, with conjugated triple bonds, 133
NMR, spectra of polypropylene-ethylene copolymers, 109
Nylon-6, melt-crystallized, inorganic salts effects on fusion temperature and crystallinity, 561
Organometallic polymers, 191
Organotin compounds, acid cleavage of, 371
Orientation rate, of polyethylene crystals, 543
Permeation chromatography calibration, effect of column size, theta conditions, flow rate, 261
Phenol-formaldehyde polymer, fracture surface regularity, 677
4-Phenyl-1,2,4-triazoline-3,5-dione, spontaneous copolymerization with vinyl ethers, 115
Photodegradation, of polyethylene, mechanism of, 565
Photopolymerization, 425, 777
contribution from charge-transfer monomer complexes to initiation reaction, 907
PMR study, reaction of 1,3-butadiene with bis-(π-crotyl nickel iodine), 71
Polarization, dynamic nuclear, chemically induced in polymerization reactions, 681
Polyacrylonitrile, drawn, evidence of colloidal structure, 529
Polyamides, aliphatic and aromatic, mechanical relaxations in, 253
stereospecific asymmetric, circular dichroism of, 161
Polycarbonate, evidence for chain backbone motion below T_g, 611
Poly(2,6-dimethyl)phenylene oxide melts, nucleation and crystallization of, 435
Polydimethyl siloxane, linear, production of cyclic molecules during γ-irradiation, 863
Polyelectrolyte biopolymers, 467
Poly(ether-urethanes), from bis(N-vinyl carbamates) and diols, 911
Polyethylene, drawn, density of, 211
halogenation of, 843
mechanism of photodegradation, 565
nascent, epitaxial growth of, 297
n-C_4H_{10} diffusion in, 477
rheology at high pressures, 717
single crystals, studies of 2-phase structure of, 583
Polyethylene crystals, orientation

rate of, 543
Polyethylene oxide, end group association in, 651
Poly(ethylene terephthalate), photochemical decomposition mechanism, 665
Polyethylene transparency, origin of, 595
Poly-L-guluronic acid, crystalline structures of, 311
Polyhexamethylene-α-truxillamide, photodegradable polymer, 685
Poly(β-hydroxybutyrate), synthesis and characterization of, 173
Polyisobutylene-decalin system, temperature dependence of dynamic properties, 449
Polyisobutylene oxide spherulites, 3-dimensional shape, 31
Polyisoprene, 1,4-, cyclized, differentiation between cyclopolyisoprene, 49
grafting limit of, on carbon black, 195
Poly-D-mannuronic acid, crystalline structures of, 311
Polymethacrylonitriles, micro tacticity of, 103
Polymer, photodegradable, 685
Polymer films, anomalous conduction in, 43
preparation for contact angle measurement, 569
Polymeric amine, determination of degree of polymerization, 657
Polymerization, by metal perchlorates, of epoxides and episulfides, 225
by radical initiators, of tetraoxane, 839
cationic, of N,N′-disubstituted-2-iminooxazolidines, 735
cationic, of indene, 891
cationic, of styrene, 463
comonomer charge transfer complex, interactions in the second stage, 269
degree of determined, for polymeric amine, 657
in aqueous solution, polyoxymethylene epitaxial crystallization during, 895
involving hydrogen and methyl group migration, 599
linear, of 2 methylbut-3yn-2-ol, 19
of acenaphthylene with tetracyanoethylene, 533
of methyl methacrylate and methyl α-chloroacrylate, 129
of N-vinylcarbazole, in presence of carbon tetrabromide, 877
of 2-vinyl-4,4-dimethyl-5-oxazolone, 187
of vinyl monomers, by organo-iron complex, termination mechanism in, 281
of 4-vinylpyridium salts, 13
organolithium, of dienes, chain end structure, 61
photo and thermal, sensitized by doner-acceptor interaction, 327, 331
photocationic, of N-vinylcarbazole systems, 247
γ-radiation-induced, of solid N-(1,1-dimethyl-3-oxobutyl)-acrylamide (diacetone acrylamide), 831
radical, of methyl methacrylate, 375
ring-opening, of 1,1-dimethyl-1-silacyclo-3-pentene, 341
solid-state, NMR study of vinyl monomers, 483
uv-irradiation, of butadiene and acrylic monomer, 805
vinyl, 241
Ziegler-Natta, effect of hydrogen on rate of, 661
Polymerizations, alkyllithium initiated, effect of aggregate size on, 219
Polymerization reactions, chemically induced dynamic nuclear polarization in, 681
Polymer matrix, generation of free radicals in, 753
Polymers, crystalline, laser beam interaction with super molecular structural elements, 813
diffusion coefficients and intrinsic viscosities, 55
immiscible, theory of interface between, 741
organic, containing tellurium as chain atom, 95
organometallic, 191
polyurethane block, DSC studies of, 689
polyviologens, cationic polyelectrolyte redox, class of, 289
preparation of, with ethynyl group as pendant side chain, 275
vinylazidocinnamate, new photo sensitive, 81
Polymer solutions, drag-reduction effectiveness, 851
Polyoxymethylene, crystalline, end-group orientation in, 579
epitaxial crystallization in course of polymerization in aqueous solution, 895
rolled, tranverse orientation in, 623
Poly(para-biphenyl acrylate), preparation

and characterization of, 303
Poly(p-phenoxyphenyl sulfide), selective oxidation to a polysulfoxide, 91
Polypropylene, oriented, atomic stress distribution determination, 443
Polypropylene films, biaxial stretching studies, 723, 797
Poly(propylene glycol), molecular weight determined by NMR, 491
Polystyrene, molecular weight distribution of, 783
Polysulfones, structure of, of some dienes, 901
Polysulfoxide, selective oxidation of poly-(p-phenoxyphenyl sulfide) to, 91
Polyurethane block polymers, DSC studies of, 689
Polyurethanes, segmented, anisotropic superstructure in, 761
Polyurethane solutions, behavior in mixed solvents, 37
Poly(vinyl chloride), modification of, 547
stabilization mechanism, 371
thermal stability, increase of, 85
Polyviologens, cationic polyelectrolyte redox polymers, 289
Propylene, and butadiene, alternating copolymer, NMR spectra of, 931
PVC, see poly(vinyl chloride)
Ramp-function velocity-gradient shearing flow, new material function from, 757
Rayon blends, radiation-induced reaction of styrene with, 915
Reaction order, method for determining, 395
Recycle gel permeation chromatography, 353, 429
Rheological method, of investigating reaction between cerium (IV) and starch, 711
Rheology, of polyethylene at high pressures, 717
Ruthenium (III) complexes, hydrogenation with mesityl oxide, 729
Solutions, polyurethane, behavior in mixed solvents, 37
Spherulites, polyisobutylene oxide, 3-dimensional shape, 31
Stannic chloride-methyl methacrylate complex, interaction with styrene and toluene, 789, 883
Starch, and cerium (IV), rheological method of investigating reaction between, 711
Styrene, and acrylonitrile, copolymerization under uv-irradiation, 823
cationic polymerization of, 463
photochemically initiated copolymerization, with methyl methacrylate and acrylonitrile, 927
radiation-induced reaction with cotton and rayon blends, 915
Styrene-1 α-methylstyrene, block copolymers, investigations on conformations, 871
Sulfur dioxide, liquid, radical copolymerization with 2,3-diphenylbutadiene, 473
Surfaces, modifying by a novel method, 751
Synthesis, of poly(β-hydroxybutyrate), 173
of 2-vinyl-4,4-dimethyl-5-oxazolone, 187
of vinylfluorene-vinylfluorenone polymers, 671
TCNQ complexes, elastomeric, electrical conductivity of, 627
Tellurium, as a chain atom in organic polymers, 95
Tetracyanoethylene, polymerization with acenaphthylene, 533
Tetraoxane, polymerization by radical initiators, 839
Trans-1,4-polyisoprene, crystallized in stretched state, 771
Ultraviolet irradiation, role in alternating copolymerization, 179
Vanadyl compound, role in alternating copolymerization, 179
Vinylazidocinnamate polymers, new photosensitive, 81
N-Vinylcarbazole, polymerization in presence of carbon tetrabromide, 877
N-Vinylcarbazole systems, photocationic polymerization of, 247
Vinyl chloride, alternating copolymerization with complexed acrylonitrile, 539
and methyl methacrylate, equimolar alternating copolymers, 419
and methyl methacrylate, preparation and lactonization of alternating copolymer, 347
2-Vinyl-4,4-dimethyl-5-oxazolone, synthesis and polymerization of, 187
Vinyl ethers, spontaneous copolymerization with 4-phenyl-1,2,4-triazoline-3,5,dione, 115
Vinylfluorene-vinylfluorenone polymers, synthesis of, 671
Vinylhydroquinone, and methyl methacry-

late, copolymerization, 367
Vinylidene chloride, and complexed acrylonitrile, alternating copolymer from, 205
Vinyl monomers, γ-irradiated, NMR study of solid-state polymerization, 483
polymerization by organo-iron complex, termination mechanism of, 281
Vinyl polymerization, 241, 264
Vinylpyridinium salts, polymerization of, 13
Vinylpyridinium verbindungen, Untersuchung von, 1
Viscosities, intrinsic, of polymers, 55

Statement of ownership, management, and circulation (Act of August 12, 1970: Section 3685, Title 39 United States Code)

1. Date of filing: October 21, 1971
2. Title of Publication: JOURNAL OF POLYMER SCIENCE, PART B: POLYMER LETTERS
3. Frequency of issue: monthly
4. Location of known office of publication: 20th and Northampton Streets, Easton, Pennsylvania 18042
5. Location of headquarters of general business offices of publisher: 605 Third Avenue, New York, New York 10016
6. The names and addresses of publisher, editor, and managing editor:

Publisher: John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10016
Editor: Herman Mark, Polytechnic Institute of Brooklyn, 333 Jay Street, Brooklyn, New York 11201, C. G. Overberger, Univ. of Michigan, Ann Arbor, Mich., and T. G Fox, Mellon Institute, Pittsburgh, Pennsylvania 15213
Managing Editor: None

7. Owner: John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10016

The following is a list of stockholders owning or holding 1% or more of John Wiley & Sons, Inc. stock as of September 24, 1971:

Cynthia W. Darby, Box 651, Bridgehampton, New York 11932; John P. Gilbert, exec. of estate of Julia Wiley Gilbert, c/o Wells Fargo Bank, Trust Division 37165, P.O. Box 3820, San Francisco, California 94120; Edward P. Hamilton, 605 Third Avenue, New York, New York 10016; W. Bradford Wiley & Francis Lobdell, Trustees, Elizabeth W. Hamilton Trust, 605 Third Avenue, New York, New York 10016; Edward P. Hamilton, Trustee under will of Elizabeth Wiley Hamilton, c/o Gifford, Woody, Carter & Hays, 1 Wall Street, New York, New York 10005; I. M. Kolthoff, University of Minnesota, School of Chemistry, Minneapolis, Minnesota; Eric S. Proskauer & Charles H. Lieb, Trustees, u/a by Jenny R. Proskauer, 220 Central Park South, New York, New York 10019; Francis Lobdell & William J. Seawright, Trustees, f/b/o Deborah Elizabeth Wiley, c/o John Wiley & Sons, Inc., 605 Third Avenue, New York, New York; Cynthia W. Darby & Julia Gilbert, Trustees, under will of Kate R. Q. Wiley, c/o Gifford, Woody, Carter & Hays, 1 Wall Street, New York, New York; Francis Lobdell & William J. Seawright, Trustees, f/b/o Peter Booth Wiley, c/o John Wiley & Sons, Inc., 605 Third Avenue, New York, New York; Francis Lobdell & William J. Seawright, Trustees, f/b/o William Bradford Wiley II, c/o John Wiley & Sons, Inc., 605 Third Avenue, New York, New York; Edward P. Hamilton & Cynthia Wiley Darby, Trustees under will of William O. Wiley, c/o Gifford, Woody, Carter & Hays, 1 Wall Street, New York, New York; Adele E. Windheim, 8 Dundee Road, Larchmont, New York; Cudd & Company, 1 Chase Manhattan Plaza, New York, New York; Dif & Company, P. O. Box 1447, 135 Devonshire Street, Boston, Massachusetts; W. Bradford Wiley & E. P. Hamilton, Trustees for Edward P. Hamilton Foundation, c/o John Wiley & Sons, Inc., 605 Third Avenue, New York, New York; Pitt & Company, P. O. Box 2444, Church Street Station, New York, New York; Reing & Company, P. O. Box 491, Church Street Station, New York, New York; Shaw & Company, P. O. Box 491, Church Street Station, New York, New York 10015; Sigler & Company, c/o Manufacturers Hanover Trust Company, New York, New York 10015; Trussal & Company, National Bank of Detroit, c/o Trust Department, Detroit, Michigan; Front & Co., Brown Brothers Harriman, 10 P. O. Square, Boston, Massachusetts 02109; Lane & Co., Southern California First National Bank, c/o Trust Department, San Diego, California 92112; Pendiv & Co., Bankers Trust Company, 16 Wall Street, New York, New York 10005

8. Known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more o total amount of bonds, mortgages, or other securities: None
9. Not applicable.
10. Not applicable.

11. Extent and nature of circulation	Average no. copies each issue during preceding 12 months	Single issue nearest of filing date
A. Total no. copies printed (*net press run*)	2900	2900
B. Paid circulation		
1. Sales through dealers and carriers, street vendors and counter sales	—	—
2. Mail subscriptions	2392	2392
C. Total paid circulation	2392	2392
D. Free distribution by mail, carrier or other means		
1. Samples, complimentary, and other free copies	122	122
2. Copies distributed to News Agents, but not sold	—	—
E. Total distribution (*Sum of C and D*)	2514	2514
F. Office use, left-over, unaccounted, spoiled after printing	386	386
G. Total (*Sum of E & F—should equal net press run shown in A*)	2900	2900

(Signature of editor, business manager or owner)

I certify that the statements made by me above are correct and complete.

Handbuch der Chemischen Untersuchung der Testilfaserstoffe, H. M. Ulrich. Reviewed by EMERY I. VALKO 79

ISSUE NO. 2, FEBRUARY

AKIRA YABE and MINORU TSUDA: New Photosensitive Vinylazidocinnamate Polymers 81
J. MALÁČ: Increase of PVC Thermal Stability Through Chemical Modification by Dibutylester of Malein Acid 85
TAMOTSU FUJISAWA, MASAMI KAKUTANI, and NORIO KOBAYASHI: Selective Oxidation of Poly(p-Phenoxyphenyl Sulfide) to a Polysulfoxide 91
H. K. LIVINGSTON and RICHARD KROSEC: Organic Polymers Containing Tellurium as a Chain Atom 95
NORMAN G. GAYLORD, AKIO TAKAHASHI, and LALIT C. ANAND: Preparation of Alternating Copolymers in the Presence of Metal Halides in an Aqueous Medium 97
AKIRA YAMADA and MASAYA YANAGITA: Microtacticity of Polymethacrylonitriles 103
YOSHINOBU TAKEGAMI and TOSHIMITSU SUZUKI: 220 MHz NMR Spectra of Polypropylene-Ethylene Copolymers 109
GEORGE B. BUTLER, LAWRENCE J. GUIBAULT, and S. RICHARD TURNER: Spontaneous Copolymerization of 4-Phenyl-1,2,4-Triazoline-3,5-Dione with Vinyl Ethers 115
GEORGE B. BUTLER and A. JACKSON SHARPE, JR.: Spontaneous Cyclocopolymerization of an Electron-Donor, Electron-Acceptor 1,4-Diene Pair 125
DAVID S. BRESLOW and ABRAHAM KUTNER: Stereospecific Polymerization of Methyl Methacrylate and Methyl α-Chloroacrylate with Modified Grignard Reagents 129
GERHARD WEGNER: Topochemical Reactions of Monomers with Conjugated Triple Bonds. III. Solid-State Reactivity of Derivatives of Diphenyldiacetylene 133
D. G. LEGRAND: Single Crystals of Alternating Block Copolymers of Polydimethyl Siloxane and Polycarbonate 145
L. A. GUGLIEMELLI, M. O. WEAVER, C. R. RUSSELL, and C. E. RIST: Molecular Weight Distribution of the Polyacrylonitrile Moiety of Starch-Polyacrylonitrile Graft Copolymers 151
Polymer News 157
Erratum 159

ISSUE NO. 3, MARCH

C. G. OVERBERGER and Y. SHIMOKAWA: Circular Dichroism of Stereospecific Asymmetric Polyamides Derived from Trans-1,2-Cyclopropanedicarboxylic Acid 161
C. L. MARX, J. A. KOUTSKY, and S. L. COOPER: Morphology of Butadiene-Methacrylic Acid Copolymers 167

J. REID SHELTON, JEROME B. LANDO, and DENNIS E. AGOSTINI: Synthesis and Characterization of Poly(β-Hydroxybutyrate). 173
JUNJI FURUKAWA, EIICHI KOBAYASHI, YUTAKA ISEDA, and YOSHIHIRO ARAI: Role of uv-irradiation and Vanadyl Compound in the Alternating Copolymerization 179
LLOYD D. TAYLOR, CHARLES K. CHIKLIS, and THOMAS E. PLATT: Synthesis and Polymerization of 2-Vinyl-4,4-Dimethyl-5-Oxazolone 187
CHARLES U. PITTMAN, JR., ROBERT L. VOGES, and JAMES ELDER: Organometallic Polymers XII. The Solution Copolymerization of Vinylferrocene with Maleic Anhydride 191
ENGÉNE PAPIRER, NGUYEN VAN TAO, JEAN-BAPTISTE DONNET, and GÉRARD RIESS: Grafting Limit of Polyisoprene on Carbon Black 195
JUNJI FURUKAWA and AKINORI NISHIOKA: Glass Transition Temperature of Alternating Copolymer of Acrylonitrile and Butadiene 199
GARY WENTWORTH and JOHN R. SECHRIST: Alternating Copolymer from Vinylidene Chloride and Complexed Acrylonitrile . . 205
W. GLENZ, N. MOROSOFF, and A. PETERLIN: Density of Drawn Polyethylene 211
C. M. SELMAN and H. L. HSIEH: Effect of Aggregate Size on Alkyllithium Initiated Polymerizations 219
VLADIMIR FIALA, HITOSHI YAMAOKA, and SEIZO OKAMURA: Polymerization of Epoxides and Episulfides by Metal Perchlorates 225
